Core Curriculum

Core Curriculum

Module 1

Strategy in Education

Learners will explore theoretical approaches to shaping organisations vision, culture and values and develop a critical understanding of organisational structure and approaches to business modelling. Learners also develop critical knowledge of strategies for continuous improvement.

Core Curriculum

Module 2

People Management and Development in Education

Learners study methods of leadership and management of people within organisations including approaches to talent management and people development, critically evaluating their utility and application to their context in education.

Core Curriculum

Module 3

Finance, Governance and Risk in Education

Approaches to operations are explored and critically analysed, including the management of resources and operations: the supply chain, procurement, logistics, quality systems, and project management.

Core Curriculum

Module 4

Innovation and Change in Education

This module considers approaches to innovation including creativity, intrapreneurial and entrepreneurial behaviour and enterprise development. Learners will critically evaluate approaches to executing change while developing their understanding of the importance of influencing and negotiating as part of this process.

Core Curriculum

Module 5

Research Methods & Project

During their research project learners critically evaluate their learning from the entire programme and have the opportunity to conduct research and enquiry into leadership and management issues, rigorously applying this knowledge to their individual context and setting.

Our core curriculum is available to all learners working in a leadership role. It combines practical and academic content to support the development of those knowledge, skills and behaviours that are universal when it comes to leading.
